## PURPOSE

The following list has been prepared at the request of the Agricultural Education Service of the Federal Board of Vocational Education. It is intended as a guide for the teacher of vocational agriculture to the principal sources of national economic information suitable for use by teachers. It should be supplemented by requests for help on specific subjects of local importance in cases where State institutions do not supply the information needed. It is suggested that teachers select and request only those publications which they can use, since editions are not sufficient to permit the universal distribution of all of the publications herein listed.

Compiled by J. Clyde Marquis,  
Director of Economic Information,  
Bureau of Agricultural Economics.

---

A LIST OF PUBLICATIONS ON AGRICULTURAL ECONOMICS  
OF INTEREST TO TEACHERS OF VOCATIONAL AGRICULTURE

Issued by Bureau of Agricultural Economics

Information on agricultural economics, including facts on production, marketing, and consumption, consists principally of statistics of two kinds:

1. Statistical records containing figures representing the several phases of the agricultural industry gathered by the Census, the Crop and Livestock Estimating Service, the Market News Service, and special surveys of many types.
2. Analytical and explanatory statements, reports, or reviews, which are designed to explain the changes that have occurred and the various factors that have caused these changes.

The volume and variety of agricultural statistics are so extensive that the agricultural student is at a loss to know how to use the information until the material is organized into some systematic course of presentation. This is the task of the teacher. In order to assist teachers in presenting to students the materials regarding agricultural economics, the following lists have been prepared covering only those publications of importance to the beginner.

The best approach is through the study of a single commodity. When the types of information relating to one farm product have been traced through the various forms of publication, the student can take up other commodities and gradually become acquainted with the sources and character of economic information. Taking wheat as an example: the facts on wheat production in the world and in the United States over a period of years can be found in the statistical section of the Yearbook of the Department of Agriculture. The production of the United States for the current year is issued in the December number of the statistical monthly "Crops and Markets" by States and principal types of wheat. The price of wheat in past years is recorded in the Yearbook; monthly farm prices are published in "Crops and Markets"; week-to-week summaries appear in the Weekly Grain Market Review issued by the Market News Service. The changes in world production, movement, and price of wheat are summarized in the Foreign Service releases called "Foreign News on Wheat", which are issued monthly. The changes in the United States wheat market are traced in detail in the Quarterly Grain Market Review. An annual survey of the prospects for wheat growers is found in the annual Outlook Report.

The commodity approach is the quickest and easiest way for the teacher and establishes the most vital contact with the interest of the student, since most students come from agricultural sections in which there are certain outstanding farm products. A student who takes up the study of production and marketing of a crop that is important in his home community, can supplement the information he gets from the statistics by local experience. He soon discovers that statistics are not merely a mass of dull figures, but constitute a body of closely condensed and organized information which gives a picture of economic conditions. Necessary facts, conditions and changes are too numerous to comprehend without the devices of tables, charts of curves, index numbers, etc.

## PRINCIPAL FORMS OF ECONOMIC INFORMATION

---

Economic information is made available for teachers by the Bureau of Agricultural Economics in the following forms:

- |                                 |                               |
|---------------------------------|-------------------------------|
| (1) The Yearbook of Agriculture | (6) Branch-office mimeographs |
| (2) Printed bulletins           | (7) Press releases            |
| (3) Printed periodicals         | (8) Radio releases            |
| (4) Mimeographed periodicals    | (9) Economic charts           |
| (5) Mimeographed reports        | (10) Correspondence           |

### PRINTED PUBLICATIONS

The Yearbook of Agriculture of the Department - Contains miscellaneous articles of current interest and a large number of statistical tables. Distributed free largely by Members of Congress. A limited supply is distributed by the department.

Yearbook Statistical Separates - These are reprints from the yearbook in pamphlet form of statistics of certain products. Distributed on request by the department. These include the following from the 1928 yearbook:

- |              |       |  |
|--------------|-------|--|
| Separate No. | 1026: | Statistics of Grains   |
| "            | "     | 1027: Statistics of Fruits and Vegetables                            |
| "            | "     | 1028: Statistics of Field Crops other than Grains                    |
| "            | "     | 1029: Statistics of Farm Animals and Animal Products                 |
| "            | "     | 1030: Dairy and Poultry Statistics                                   |
| "            | "     | 1031: Foreign Trade of the United States in<br>Agricultural Products |
| "            | "     | 1032: Miscellaneous Agricultural Statistics                          |
| "            | "     | 1101: Agricultural Maps  |

Statistical Bulletins - These are Statistical compilations, usually showing the figure for several years in the past. The list now includes about 30 titles. Some of which are revisions or second editions. A list will be found on later pages of this circular under the List of Bulletins of Interest to Teachers.

## PRINTED PERIODICALS

The Agricultural Situation - This is a condensed economic summary prepared monthly to provide the busy agricultural worker with the highlights of changes in agriculture. It contains a record of the general price changes of the past month, articles discussing changes with the principal farm products, and frequent discussions of the world-wide situation. A file of this publication provides a good general review of the year's changes.

Crops and Markets - This is the monthly statistical publication of the department containing crop reports, market reports, prices, and other information as gathered regularly by various divisions of the Bureau of Agricultural Economics. It is the principal statistical journal on agriculture. It contains the summary of the monthly price situation which is the most complete record of price changes of farm products issued by the bureau. It carries a page of charts of the price changes of principal farm products covering a period of five years. A file of Crops and Markets for a year is the best single reference volume of agriculture.

## AGRICULTURAL OUTLOOK REPORTS

The annual agricultural outlook report is prepared in January just as early as the final reports on the previous year's farm operations become available. This report is prepared at a conference of the various commodity specialists of the bureau, assisted by specialists from other bureaus in the Department of Agriculture, and economists and extension workers from various States. This group is organized into committees, each of which analyses the facts regarding a single commodity and prepares a statement describing the situation during the past year and the probable trends of the coming year. The outlook is designed to bring together all available facts which will help producers to decide upon their plans for the year.

The Federal outlook report is printed as a circular. Over 200,000 copies are distributed through extension workers, crop reporters, and others. Copies are available to all teachers upon request.

State Outlook Reports - Following the preparation of the Federal outlook report, many of the State Colleges and Extension Services prepare State outlook reports bearing particularly upon conditions in their several localities. Federal men cooperate in this work and in the outlook meetings which are held in the States. In some instances regional outlook conferences are held in which the problems of a region are given special consideration. The Extension Service of each State can furnish information as to the character of outlook reports available within that State.

Seasonal Outlook Reports - Supplementary statements revising the annual outlook report are issued during certain periods of the year on certain farm products. A summer hog outlook statement is issued in July following the June Pig Survey. Summer reports are also issued on lambs, beef cattle, winter wheat, and poultry. These reports are distributed in mimeographed form by the Bureau of Agricultural Economics and are published in "Crops and Markets".

Economic Charts - Charts and maps on economic subjects to the numbers of many thousands are made available to teachers in the form of photographic prints, rotaprint books, and bromide enlargements. A list of these economic charts, classified by agricultural subjects, is issued for the use of economic workers and teachers. Any one may secure photographic prints of charts or maps. The price is 10¢ each for 8 x 10 prints; 50¢ each for bromide enlargements, 28 x 34; if the latter are mounted on muslin they are \$1.00 each.

Outlook Chart Books - A series of handbooks, pocket size, 4 x 7 inches, containing maps and charts of the principal crops with explanatory legends, are issued for outlook workers. This list now covers the following subjects:

Wheat	Fruits	Sheep and lambs
Feed crops	Beef cattle	and
Potatoes	Hogs	Poultry

These chart books are not yet available in quantity for general distribution.

Wall Charts - Enlargements of outlook charts suitable for use in lectures in classrooms are available upon order at 50¢ each for unmounted prints and \$1.00 each if mounted on linen 28 x 34 inches. Orders can be filled only as the photographic facilities of the bureau permit.

Film Strips of Charts - The outlook charts have been reproduced in film strips for projection upon the screen. These rolls containing about 100 selected charts, can be obtained from the bureau or Extension Service for \$1.00 each. These film strips form a most convenient method of handling the material where a darkened room and screen are available; they are much less expensive than wall charts.

## FEDERAL AND STATE CROP AND LIVESTOCK ESTIMATES

The Crop and Livestock Estimating Service consists of the Crop Reporting Board and the staff of the Division of Crop and Livestock Estimates at Washington and 44 State statisticians who are located in States. These men work under general direction of the office at Washington, gathering and distributing State information and forwarding it to Washington to become a part of the Federal reports. Each of these State officers can furnish estimates of the crops and livestock in their respective States, as well as copies of the Federal reports.

### LIST OF STATE STATISTICIANS

Alabama	F.W. Gist	State Dept. of Agric. & Industries, Montgomery.
Arizona	M.R. Wells	Box 833 - 212 Industrial Congress Bldg., Phoenix.
Arkansas	C.S. Bouton	344 State House, Little Rock.
California	G.A. Scott	Box 1205 State Office Bldg., Sacramento.
California	E.E. Kaufman	Box 1205 State Office Bldg., Sacramento.
Colorado	F.W. Beier, Jr.	715 Mining Exchange Bldg., Denver.
Colorado	H.L. Collins	715 Mining Exchange Bldg., Denver.
D.C.	S.R. Newell	Room 500, 200-14th Street, S.W., Washington
Florida	H.A. Marks	Box 273 - 308 Smith Building, Orlando.
Georgia	D.L. Floyd	805 Commercial Exchange Bldg., Atlanta.
Idaho	J.H. Jacobson	Box 1585 - 423 First National Bank Bldg., Boise.
Illinois	A.J. Surratt	Box 285 - 206 E. Adams Street, Springfield.
Indiana	M.M. Justin	Agr. Experiment Sta. Annex (Purdue Univ.) W. Lafayette.
Iowa	L.M. Carl	305 New Federal Court House, Des Moines.
Kansas	E.C. Paxton	c/o State Board Agriculture, State House, Topeka.
Kentucky	H.F. Bryant	Box 51 - 522 Custom House, Louisville.
Louisiana	L.L. Janes	Box 95 - 339 Post Office Bldg., New Orleans.
Massachusetts	C.D. Stevens	Room 423, 261 Franklin Street, Boston.
Massachusetts	F.V. Waugh	261 Franklin Street, Boston.
Michigan	V.H. Church	730 State Office Building, Lansing.
Minnesota	P.H. Kirk	309 Old Capitol, St. Paul.
Mississippi	D.A. McCandliss	Box 1008 - 204 Federal Bldg., Gulfport.
Missouri	E.A. Logan	113 Waters Hall, Columbia.
Montana	J.G. Diamond	110 State Capitol, Helena.
Nebraska	A.E. Anderson	1114 State House, Lincoln.
New Jersey	G.L. Morgan	Room 1121, Trenton Trust Bldg., Trenton.
New Mexico	R.F. Hare	Federal Bldg., Las Cruces.
New York	R.L. Gillett	122 State Street, Albany.
N. Carolina	Frank Parker	Box 910 State Dept. of Agric. Bldg., Raleigh.
North Dakota	B.U. Keiholz	306 Post Office Bldg., Grand Forks.
Ohio	G.S. Ray	Box 353 - 45 Federal Bldg., Columbus.
Oklahoma	Carl H. Robinson	State Capitol Building, Oklahoma City.
Oregon	P.C. Newman	612 Oregon Building, Portland.
Pennsylvania	E.L. Gasteiger	Box 248 State Capitol, Harrisburg.
South Carolina	Frank O. Black	Box 448 - Draughon Bldg., Columbia.
South Dakota	J.L. Orr	Ext. Bldg., College of Agriculture, Brookings.
Tennessee	S.T. Marsh	Box 1503 College of Agriculture, Knoxville.
Texas		Box 1057 Post Office Bldg., Austin.
Utah	Frank Andrews	323 Ness Bldg., Salt Lake City.
Virginia	H.M. Taylor	Box 1211 State Office Bldg., Richmond.
Washington	J.S. Dennee	417 Arctic Bldg., Seattle.
West Virginia	T.F. McDonough	Box 1361 c/o State Dept. of Agric., Charleston.
Wisconsin	W.H. Ebling	Box 351 - 424 N.E. State Capitol, Madison.
Wyoming	W.W. Putnam	Box 815 - 13 Capitol Bldg., Cheyenne.

# MARKET NEWS REPORTS ISSUED AT WASHINGTON

## AND ALL BRANCH OFFICES.

The Market News Service of the Bureau of Agricultural Economics is operated through a series of branch offices of five of the divisions of the bureau. Each branch office reports to its respective division in Washington and gathers and distributes information only on the products covered by that division. These officers are not as a rule located in the principal cities but are located near the trading centers of the products they report; therefore, no single office in the larger cities has available crop reports on all subjects. Certain mailing lists are maintained by different offices; consequently requests for publications must be sent to each office in a given city.

### LIST OF BRANCH OFFICES WITH PRODUCTS REPORTED

## LIST OF MARKET NEWS REPORTS

OF INTEREST TO TEACHERS, STUDENTS, AND FARMERS.

This list includes only those reports best suited for use in schools and does not include many reports that are used primarily by shippers and tradesmen. For any of the reports listed below write to the nearest office of the Bureau of Agricultural Economics at which the report is issued. For a complete list of all Market News reports write to the Bureau of Agricultural Economics, United States Department of Agriculture, Washington, D.C.

### COTTON

#### Daily Reports:

##### "Daily Official Report of the Designated Spot Cotton Markets."

Gives prices of middling spot cotton prevailing at 14 designated spot markets and the differences prevailing at 10 of these markets. Issued at Atlanta.

#### Weekly Reports:

##### "Weekly Cotton Review." Summarizes the domestic and foreign cotton market situation up to the close of the market on Friday.

Issued Saturday at: Charlotte, Memphis, Oklahoma City, Atlanta, and San Antonio.

### DAIRY AND POULTRY PRODUCTS

#### Daily Reports:

"Daily Market Report. (Butter, Cheese, Eggs, Dressed Poultry)." Gives market conditions, receipts, and cold-storage movement of butter, cheese, eggs, and dressed poultry; wholesale prices of butter and cheese in New York, Chicago, Boston, Philadelphia, and San Francisco. Daily storage holdings at New York, Chicago, Boston, Philadelphia, Minneapolis, San Francisco, Buffalo, Providence, Pittsburgh, Omaha, Kansas City, and St. Louis. Weekly storage holdings in a total of 26 markets. Wholesale egg prices are reported at San Francisco and Boston only. The San Francisco report shows receipts at Los Angeles and Portland, also storage movements once each week at those points and at Seattle, San Diego, Santa Rosa, and Petaluma. Issued at: New York, Chicago, Boston, Philadelphia, Minneapolis, San Francisco, Seattle, and Portland.

## Monthly Reports:

### "The Domestic Dairy Market Situation")

#### "The Foreign Dairy Situation"

) The portion of the report which relates to domestic markets is a general summing up of the month's developments, with an interpretation of the changes occurring. It applies to all dairy products. Statistical tables show current production, stocks, trade output, and total milk equivalents of butter, cheese, and condensed milk.

The foreign portion of the report centers around information relating to receipts of butter and cheese at important foreign markets, and trends of dairy products in important dairy producing areas. It emphasizes conditions affecting demand in foreign markets. A statistical table shows the relation between prices of butter at New York, Copenhagen, Berlin, and London. Issued at Washington.

"Monthly Egg and Poultry Market Situation." Contains comment and analysis of the market situation regarding eggs and poultry; graphs showing egg and poultry receipts; cold-storage holdings, imports, and exports of eggs and poultry and their products; and special releases of particular interest to the egg and poultry industry. Issued at Washington.

## GRAIN

## Weekly Reports:

"Weekly Grain Market Review." Prepared each Saturday at the Washington office and telegraphed to branch offices. It reviews the week's developments in the markets for the principal grains, including the latest reports on the progress of the various crops both in the United States and in important foreign grain-producing countries. It reports market movements, exports, supply, and demand as they affect the domestic market situation. It gives prices of the principal grades and classes of grain in important United States markets and prices of wheat from competing countries in several European markets. Issued from Washington, Chicago, Minneapolis, Kansas City, San Antonio, Denver, Salt Lake City, San Francisco, and Portland, Oregon.

## Quarterly Report:

"Quarterly Wheat Market Situation." Gives comprehensive market reviews dealing with wheat; issued periodically when certain basic crop and market statistics become available. It reviews in considerable detail for a particular period the market situation for this grain, including price movements and changes in supply and demand conditions, as influenced by world crops, stocks, market movement, and consumption. Issued at Washington.

## HAY

## Weekly Reports:

"Weekly Hay Market Review." Covers the hay market situation throughout the country. It is prepared each Saturday in the Washington office and distributed the same day from that office and from the field offices. Issued at Washington, Minneapolis, Chicago, and Kansas City.

## HAY (Cont'd.)

### Quarterly Report:

"Quarterly Hay Market Situation." Gives the results of surveys (which are made quarterly as of March 15, June 15, September 15, and December 15) to determine the quality and relative quantity of the marketable surplus of the various kinds of hays, together with information as to the rate of marketing and quantity and location of the principal marketable surpluses on the different dates. Price trends and other important market factors are discussed. These reviews are not for general distribution but are available to State Marketing Officials, County Agents, marketing associations, and trade and farm papers. Issued at Washington.

### FEED

### Weekly Reports:

"Weekly Feed Market Review." Prepared at Washington and contains a review of the market developments as to the supply and demand for feed at the principal markets, together with prices of the more important basic feeds at the principal producing or distributing markets. Issued at Washington, Minneapolis, Chicago, Kansas City, and San Antonio.

### LIVESTOCK, MEATS, AND WOOL

### Daily Reports:

"Daily Livestock Market Report." Covers supply and demand, prices and trend of market for cattle, calves, hogs, sheep and lambs at Chicago, Denver, Fort Worth, Kansas City, Lancaster, Los Angeles, National Stock Yards, Ill., (East St. Louis), New York (including Jersey City), North Portland, Omaha, Pittsburgh, Salt Lake City, (Including Ogden), South St. Paul, San Francisco, and Wichita. Issued at: Boston, Chicago, Denver, Fort Worth, Kansas City, Lancaster, Los Angeles, National Stock Yards, North Portland, New York, Omaha, Philadelphia, Pittsburgh, Salt Lake City, San Francisco, South St. Paul, and Wichita.

### Weekly Reports:

"Weekly Review of Livestock Markets." Reviews market conditions for the week at the market where released, including detailed information as to receipts, demand, and prices paid for the various classes and grades of livestock.

Issued at: Chicago, Denver, Fort Worth, Kansas City, National Stock Yards, Ill. (East St. Louis), Omaha, South St. Paul, Los Angeles, Salt Lake City, (Including Ogden), Wichita, New York (including Jersey City), North Portland, and San Francisco.

Every Wednesday the Boston office releases a report of the Brighton Livestock market covering the Tuesday and Wednesday sessions.

## SEEDS

### Weekly Reports:

"Weekly Seed Review." Issued each Wednesday from about January 1 to June 1 (main selling season for seedmen). It gives information relative to supply of and demand for field seeds and seedmen's wholesale selling prices in the following cities: New York, Baltimore, Louisville, Chicago, Minneapolis, St. Louis, and Kansas City. Issued at Washington.

## BROOMCORN

### Weekly Report:

"Weekly Broomcorn Market Review." Issued weekly from July to December and monthly January to June; gives a summary of the broomcorn market situation in the principal markets and producing areas. Issued at Kansas City.

## FRUIT AND VEGETABLES Including Honey and Peanuts

### Daily Reports:

"Daily Market Report on Fruits and Vegetables." Summarizes number of cars of each commodity received daily, the State of origin of these commodities prevailing jobbing prices, quality and condition of receipts, and marketing and weather conditions; shipments from each State up to midnight of the night before; and numerous f.o.b. prices prevailing in producing areas. The reports cover the following commodities: Apples, asparagus, cabbage, cantaloupes, celery, grapes, lettuce, onions, peaches, pears, sweet potatoes, potatoes, strawberries, tomatoes, watermelons, and mixed and bunched vegetables. Issued at Washington in the form of a national report and at the following branch offices in a localized form: Atlanta, Baltimore, Boston, Chicago, Cincinnati, Cleveland, Denver, Detroit, Fort Worth, Kansas City, Los Angeles, Minneapolis, New York, New Orleans, Philadelphia, Pittsburgh, Portland, Ore., St. Louis, Salt Lake City, San Francisco, and Seattle.

### Weekly Reports:

"Weekly Market Review of Fruits and Vegetables." Summarizes crop and market conditions, current supplies, and prices of perishable fruits and vegetables. This report is often supplemented by detailed reports on special crops during their heaviest shipping seasons. Issued at: Atlanta, Chicago, Cincinnati, Fort Worth, Denver, Kansas City, and Washington.
